I am a web developer from Toronto with a unique background in graphic design and print production. Throughout my work experience, I continue to grow my skills in communication, creativity in designs and work to effectively meet deadlines. I focus on creating accessible websites using best coding practices and apply W3C web standards.

WORK EXPERIENCE

Freelancing   Mar 2020 - Present
- Design and build websites to the clients' specifications. Ensure websites are responsive and accessible
- Creating custom Wordpress themes and implementing ACF to allow client-side editing

Digital Press Operator   May 2017 - Present
StickerYou
- Operated on the Xeikon 3030 and ABG finisher to print, cut and finish roll labels
- Used workflow software and Adobe Illustrator to preflight files to be print ready
- Designed graphics and logos for customers using Adobe Illustrator

Graphic Designer   Sept 2016 - Jan 2017
C&D Graphic Communications
- Worked with clients and coworkers extensively to complete design related tasks
- Planned and designed for various client-related projects including branding, logo, plaques, brochures and menus

PROJECTS

Podcast Commuter
A responsive React mob programming project built using dual APIs, JSX and SASS which allow users to search for podcast based on their commute via walking or biking.

Pho 18
Designed and created a fully responsive multi-page website using HTML5, SASS, and JS. Provided photography and edited photos to be image optimized for the web.

Cafe Alice
Converted static HTML pages to be compatible for WordPress. Built a custom theme and implemented ACF, contact forms and event management for easability in client-side editing.
